
INTERNATIONAL USER GROUPS CONFERENCE 2018

April 9-13, 2018
Berlin, Germany

CALL FOR SPEAKERS

Software AG is a strong supporter of active international and local user groups, and has been for many years. This collaboration has many facets. One central aspect is the organization and sponsorship of the annual International User Groups (IUG) Conference, which takes place in a different European city every year. In 2018, the conference will be held from April 9-13 in Berlin, Germany.

IUG is our most important global meeting by customers for customers. During the conference week, all international user groups gather in the same location to exchange information and to network. A key benefit of participation is the opportunity for customers to directly influence product development by discussing product changes and enhancements.

In Berlin, our proven conference format will again feature a sequence of dedicated product sessions relevant to the international user groups. Find out what's new with Adabas & Natural, Alfabet, webMethods, ARIS and other Software AG technology and meet the people behind the products.

In their feedback after every conference, customers invariably request to see more customer presentations as they are keenly interested in learning how their peers successfully use Software AG technology to solve their business problems. We depend on you to make this happen. So, if you have a strong use case or are willing to share with the audience best practices or the major benefits your organization has realized with Software AG products and solutions, we encourage you to give a presentation at the IUG in Berlin.

Please submit your proposal to bernd.gudat@softwareag.com by January 31, 2018. Your application is subject to session availability. Sessions will be 30 to 45 minutes. Participation in IUG is for customers only and free of charge for members of the user groups.
